Steps of development

Tonya Valley Project - Creative Concept

Short Review

Creative Concept with Project Analyses

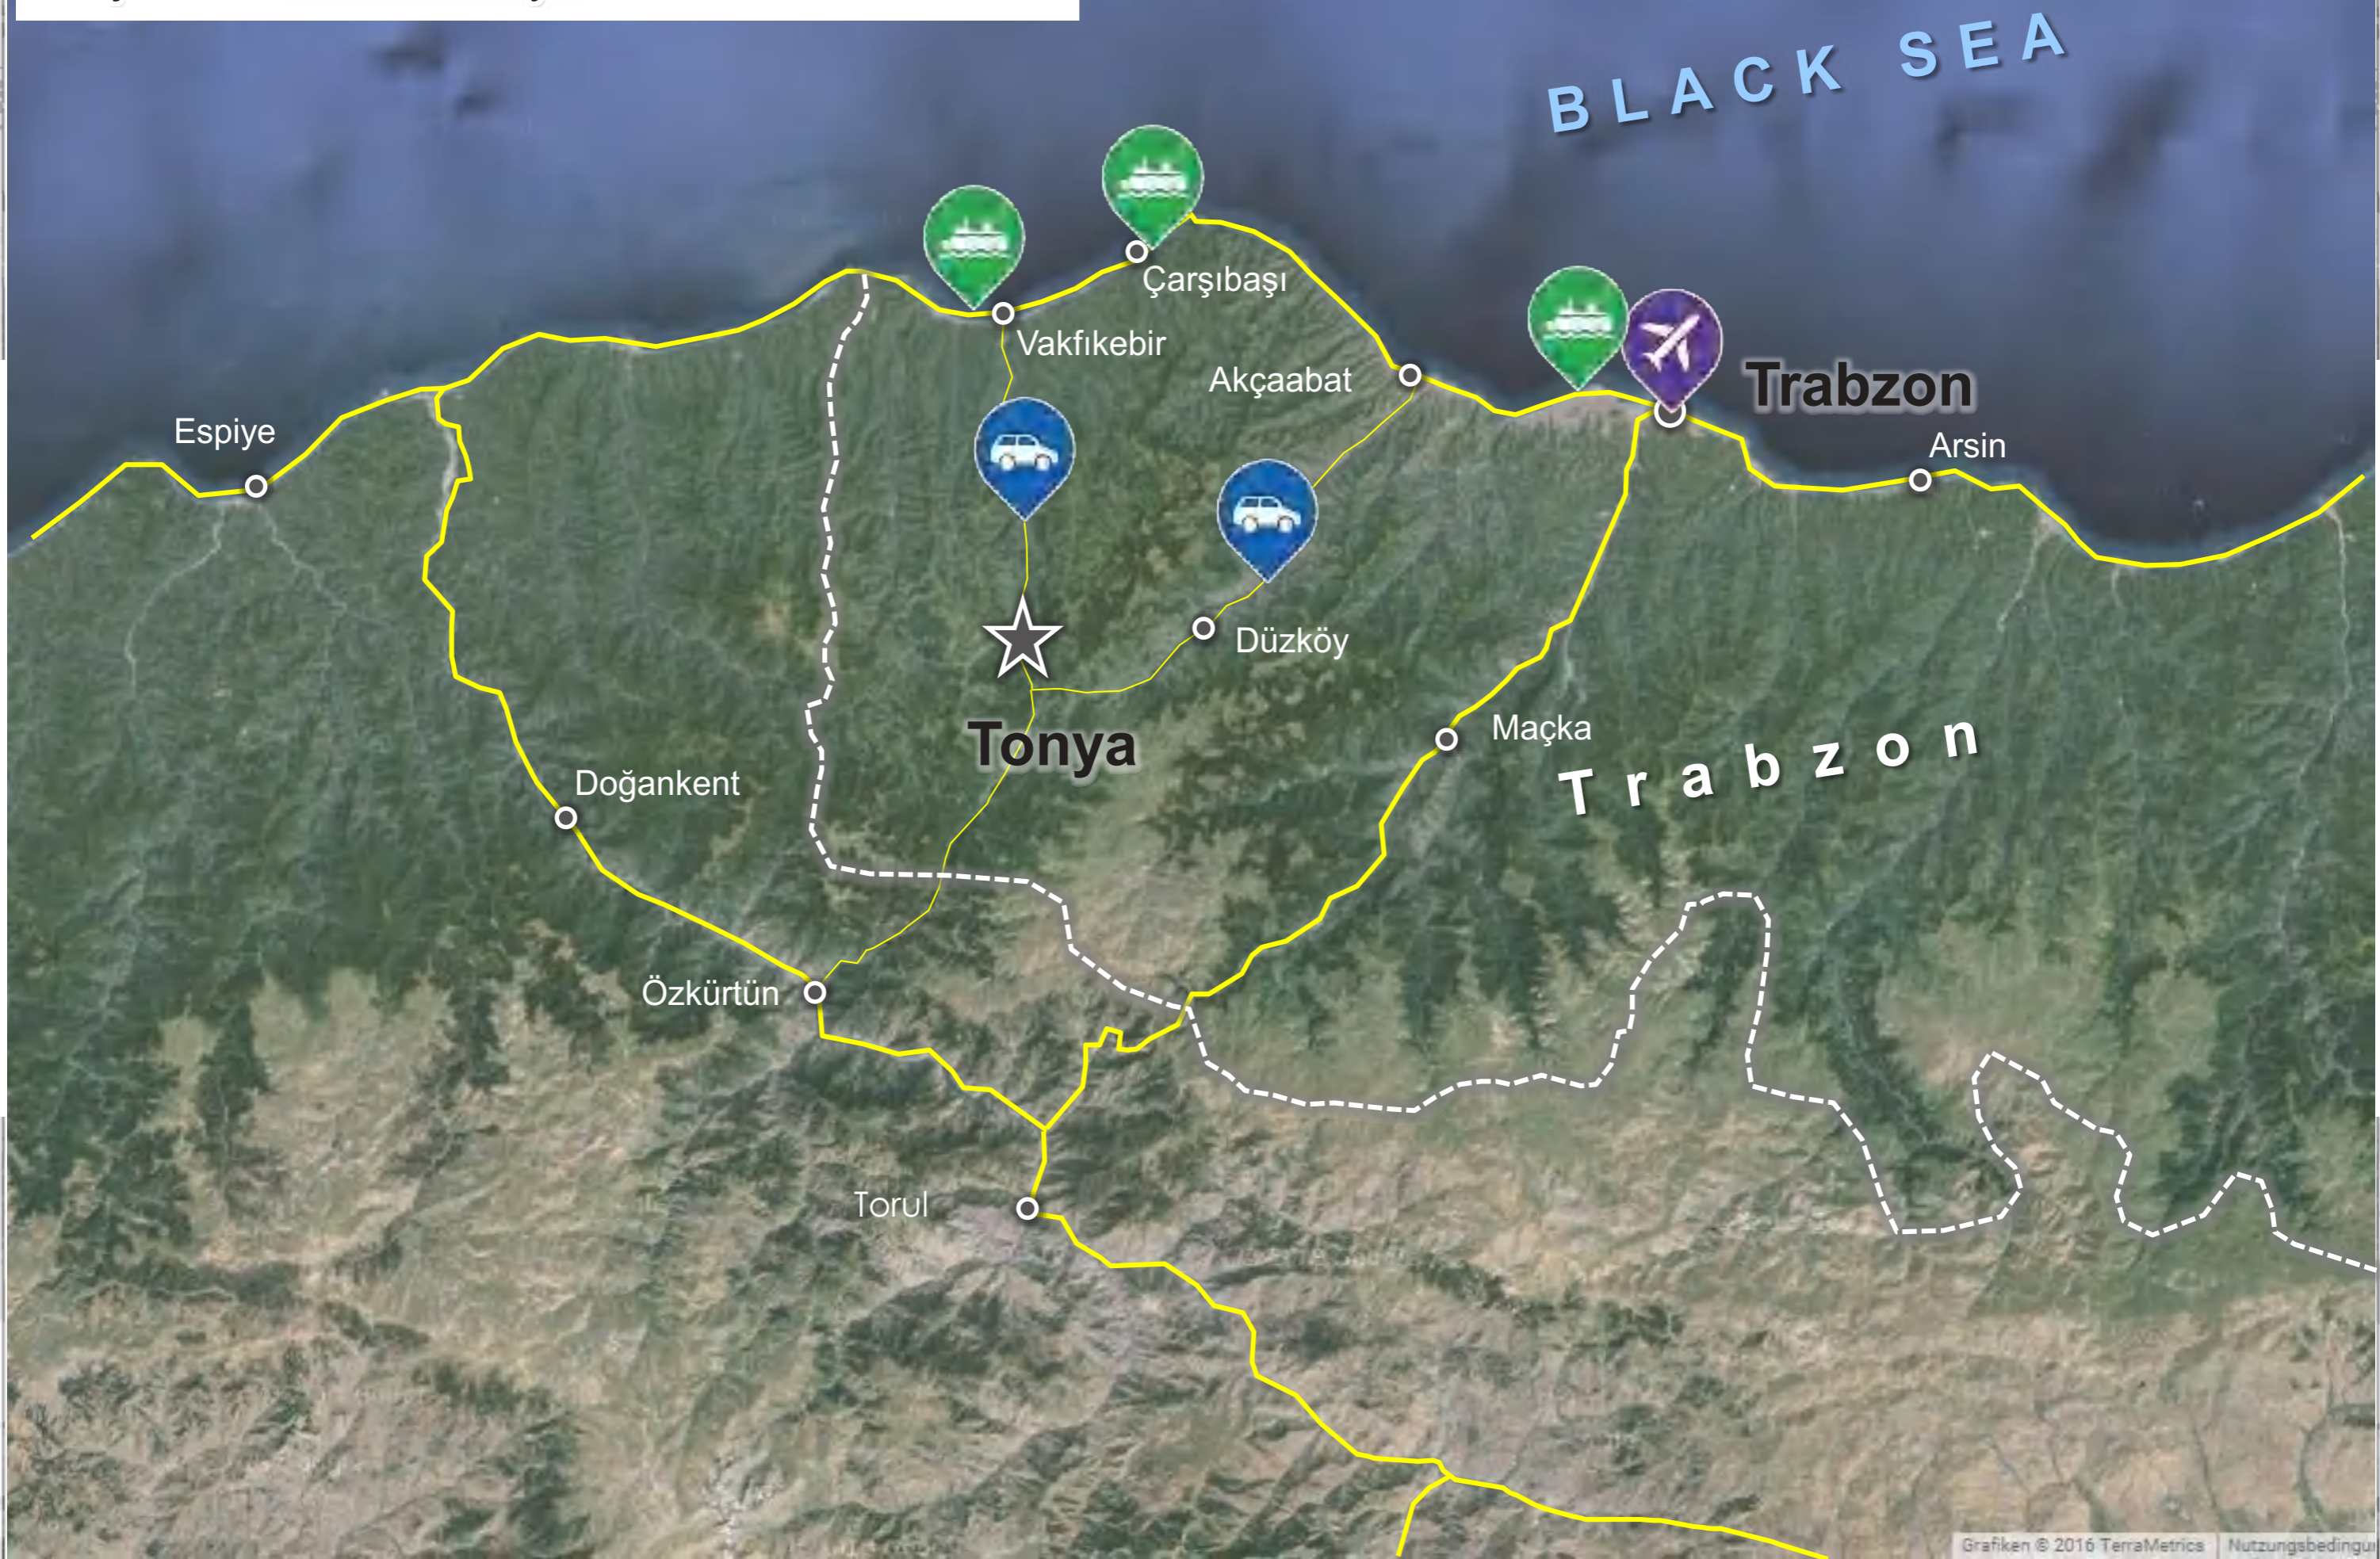

Goals of this step ...

- Potential of the region (nature, culture, tourism, history,...)
- Future tourist utilization possibilities
- Current and future conditions
- Rough development of unique selling points
- Possible characterization of the concept
- Proposals to position the destination
- Strategic orientation and formation of vision (USP)
- First ideas for the Points of Interest (POI)

Project Area

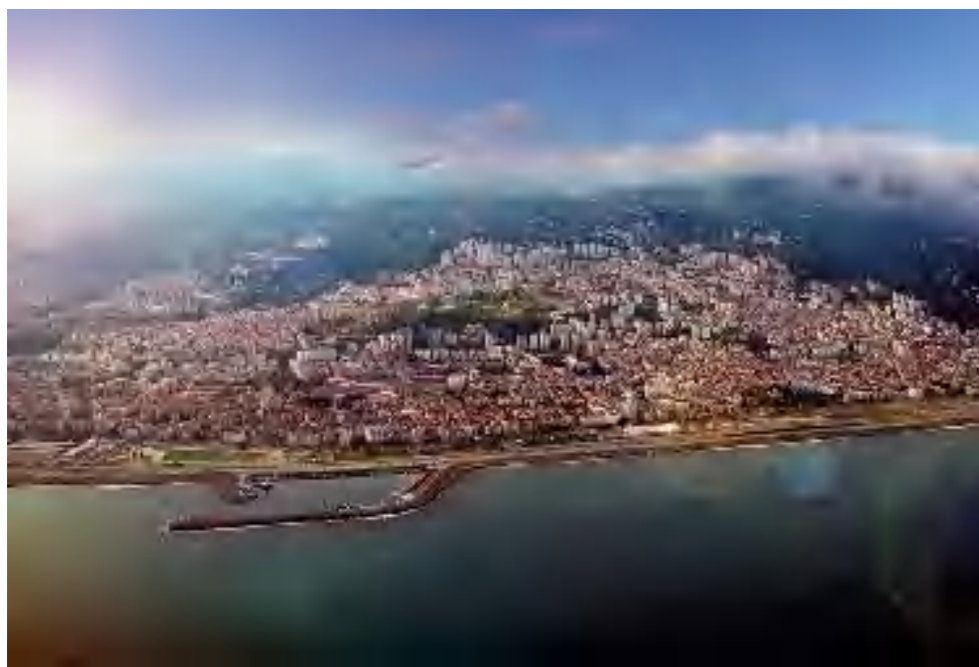

Project Area - Accessibility

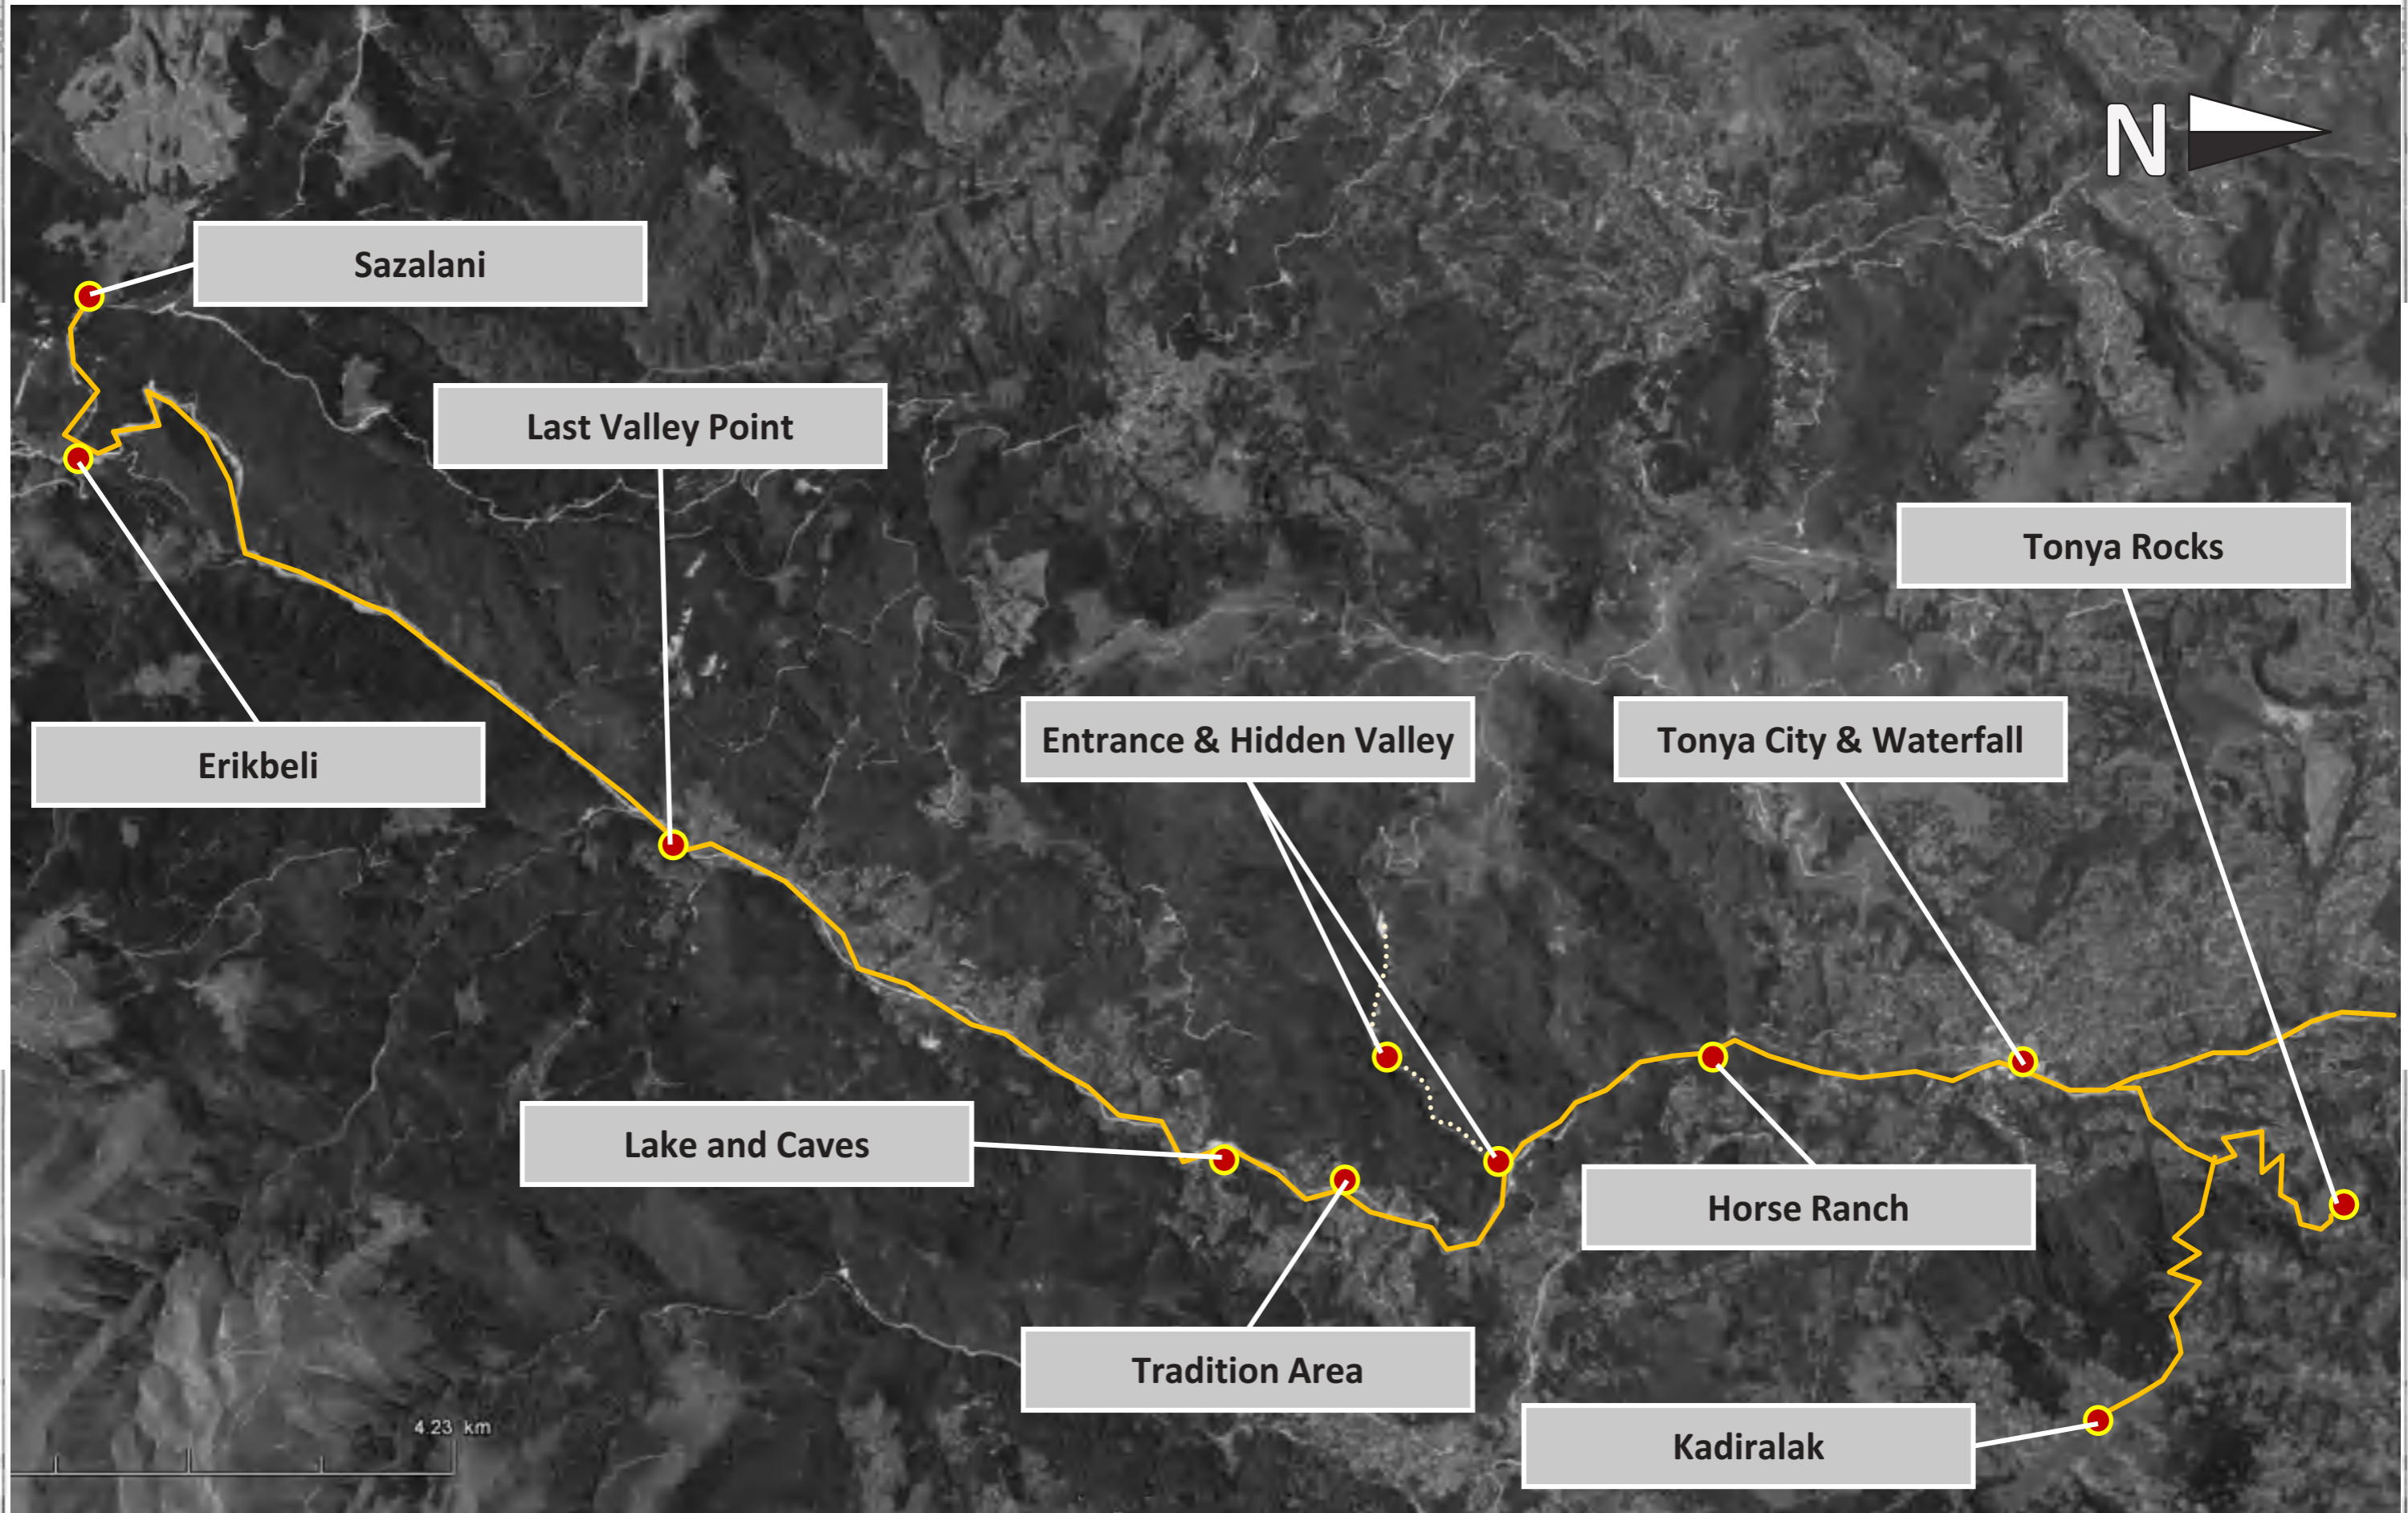

Project Area

Key Facts of Trabzon Tourism Region

- Most important time is summer - June, July, August
- Beginning extension of concentration to time from April to October
- Number of tourist in Trabzon increases strong in the last years (about 73% in the last decade)
- Most important tourist group are domestic people (about 70% in 2015)
- Most important foreign tourist group are Arabic people (about 455.000 in 2015)
- The holiday budget of Arabic people in Trabzon is about 3.000 USD per person
- Increase of investments increased the number of hotels and beds also in top categories
- Trabzon has a wide variety of nature - Sea, Beach, Mountains, Green Plateaus, Caves
- Trabzon has also a long and historic culture with some traditional specials

Points of Interest in Tonya (POI)

Valuation of POI in Tonya Valley

Point of Interest	Criteria of Evaluation					Priority
	Importance for Overall Offer	Attractiveness of Location	Necessary Investment	Income - Potential	Potential for Development	
Tonya City	1	2	\$	\$\$	high	1
Tonya Rocks (Veli Rocks)	1	1	\$\$\$	\$\$\$	very high	1
Kadiralak	3	2	\$\$\$	\$	low	3
Waterfall	3	1	\$\$	\$	medium	2
Horse Ranch Area	2	2	\$\$	\$	medium	2
Entrance to Hidden Valley	1	1	\$\$	\$\$	medium	1
Hidden Valley	2	1	\$	\$	high	1
Tradition Area	1	1	\$	\$	medium	1
Lake and Caves	2	2	\$	\$	low	2
Last Valley Point	2	3	\$\$	\$\$	medium	3
Erikbeli	3	3	\$\$	\$	low	3
Sazalani	1	1	\$	\$	high	1

Valuation of POI from 1 (very high) to 3 (very low) from \$\$\$ (very high) to \$ (very low)

Summary

Current situation, the POI and necessary measures

Tonya Valley is easily accessible

Trabzon is very likely as origin area for day trippers (locals and tourists)

Trabzon & Tonya provide an interesting contrast:

- Trabzon is by the sea, has a rather sparse vegetation and is very warm, Tonya has mountains, lush meadows, forests and streams
- Trabzon is a vibrant, modern city, Tonya still very original, rural, traditionally and culturally animated
- Trabzon provides consumption while Tonya stands for a simple and even reduced life

Tonya is a very water-rich region with a very clear and healthy air

Tonya has the potential to be used, all year round

Particularly Arab guests are a lucrative target for the summer months

They then search according to experience a pleasant, cooler, moist and healthy climate

- They are enthusiastic about attractions with a little effort and appreciate high quality meals and accommodation
- They are quite conscious of tradition, yet open to modern Western-style

Local visitors are an interesting target group during the whole year

- They are also conscious of tradition and interested in their own history and culture

Both groups of visitors are enthusiastic about good food

There are some interesting locations (POI) in Tonya Valley

Summary

Current situation, the POI and necessary measures

A concentrated offer is important

Each POI has to work for itself and be independent

Each POI gets its own orientation, theme and target group-oriented content

POI that have similar characteristics i.e. have similar themes needs to be close to each other

POI with higher attractiveness and a good investment-revenue potential has a high development priority

These are Tonya City, Tonya Rocks, Entrance to Hidden Valley, Hidden Valley, Tradition Area, and Sazalani

POI with unattractive basic requirements and little prospect of earnings are of lower priority

These are Kadiralak, Big Lake and Erikbeli

A concentrated offer is important that is as attractive as possible, ensures a long stay and is good marketable

Overall, a wide range of offers has to be developed with the highest possible coverage

At the beginning the focus has to be on less POI and these should be expanded well with a lot of attractions

Summary

Current situation, the POI and necessary measures

A concentrated offer/attraction has the following advantages:

- Every POI needs a basic infrastructure that only costs money and brings no income
- Developing a lot of POI needs a high basic investments
- At this long time of arrival the visitor also expects to be entertained that long
- To achieve that many attractions for a POI needs also a high investment per POI
- The return on investment will be reached much more quickly
- With less POI the concentration of the visitors is higher and so the places are more revived
- Like this the offer is automatically perceived as desirable and popular and considered of higher quality through the visitors

The development of new POI should only be made only when a critical minimum dimensions of visitors is reached

For the long-term development there must be accommodations in Tonya Valley

The POI located on the road and should be connected with a shuttle service

This keeps the car frequency low and gives visitors the possibility of easy relocation

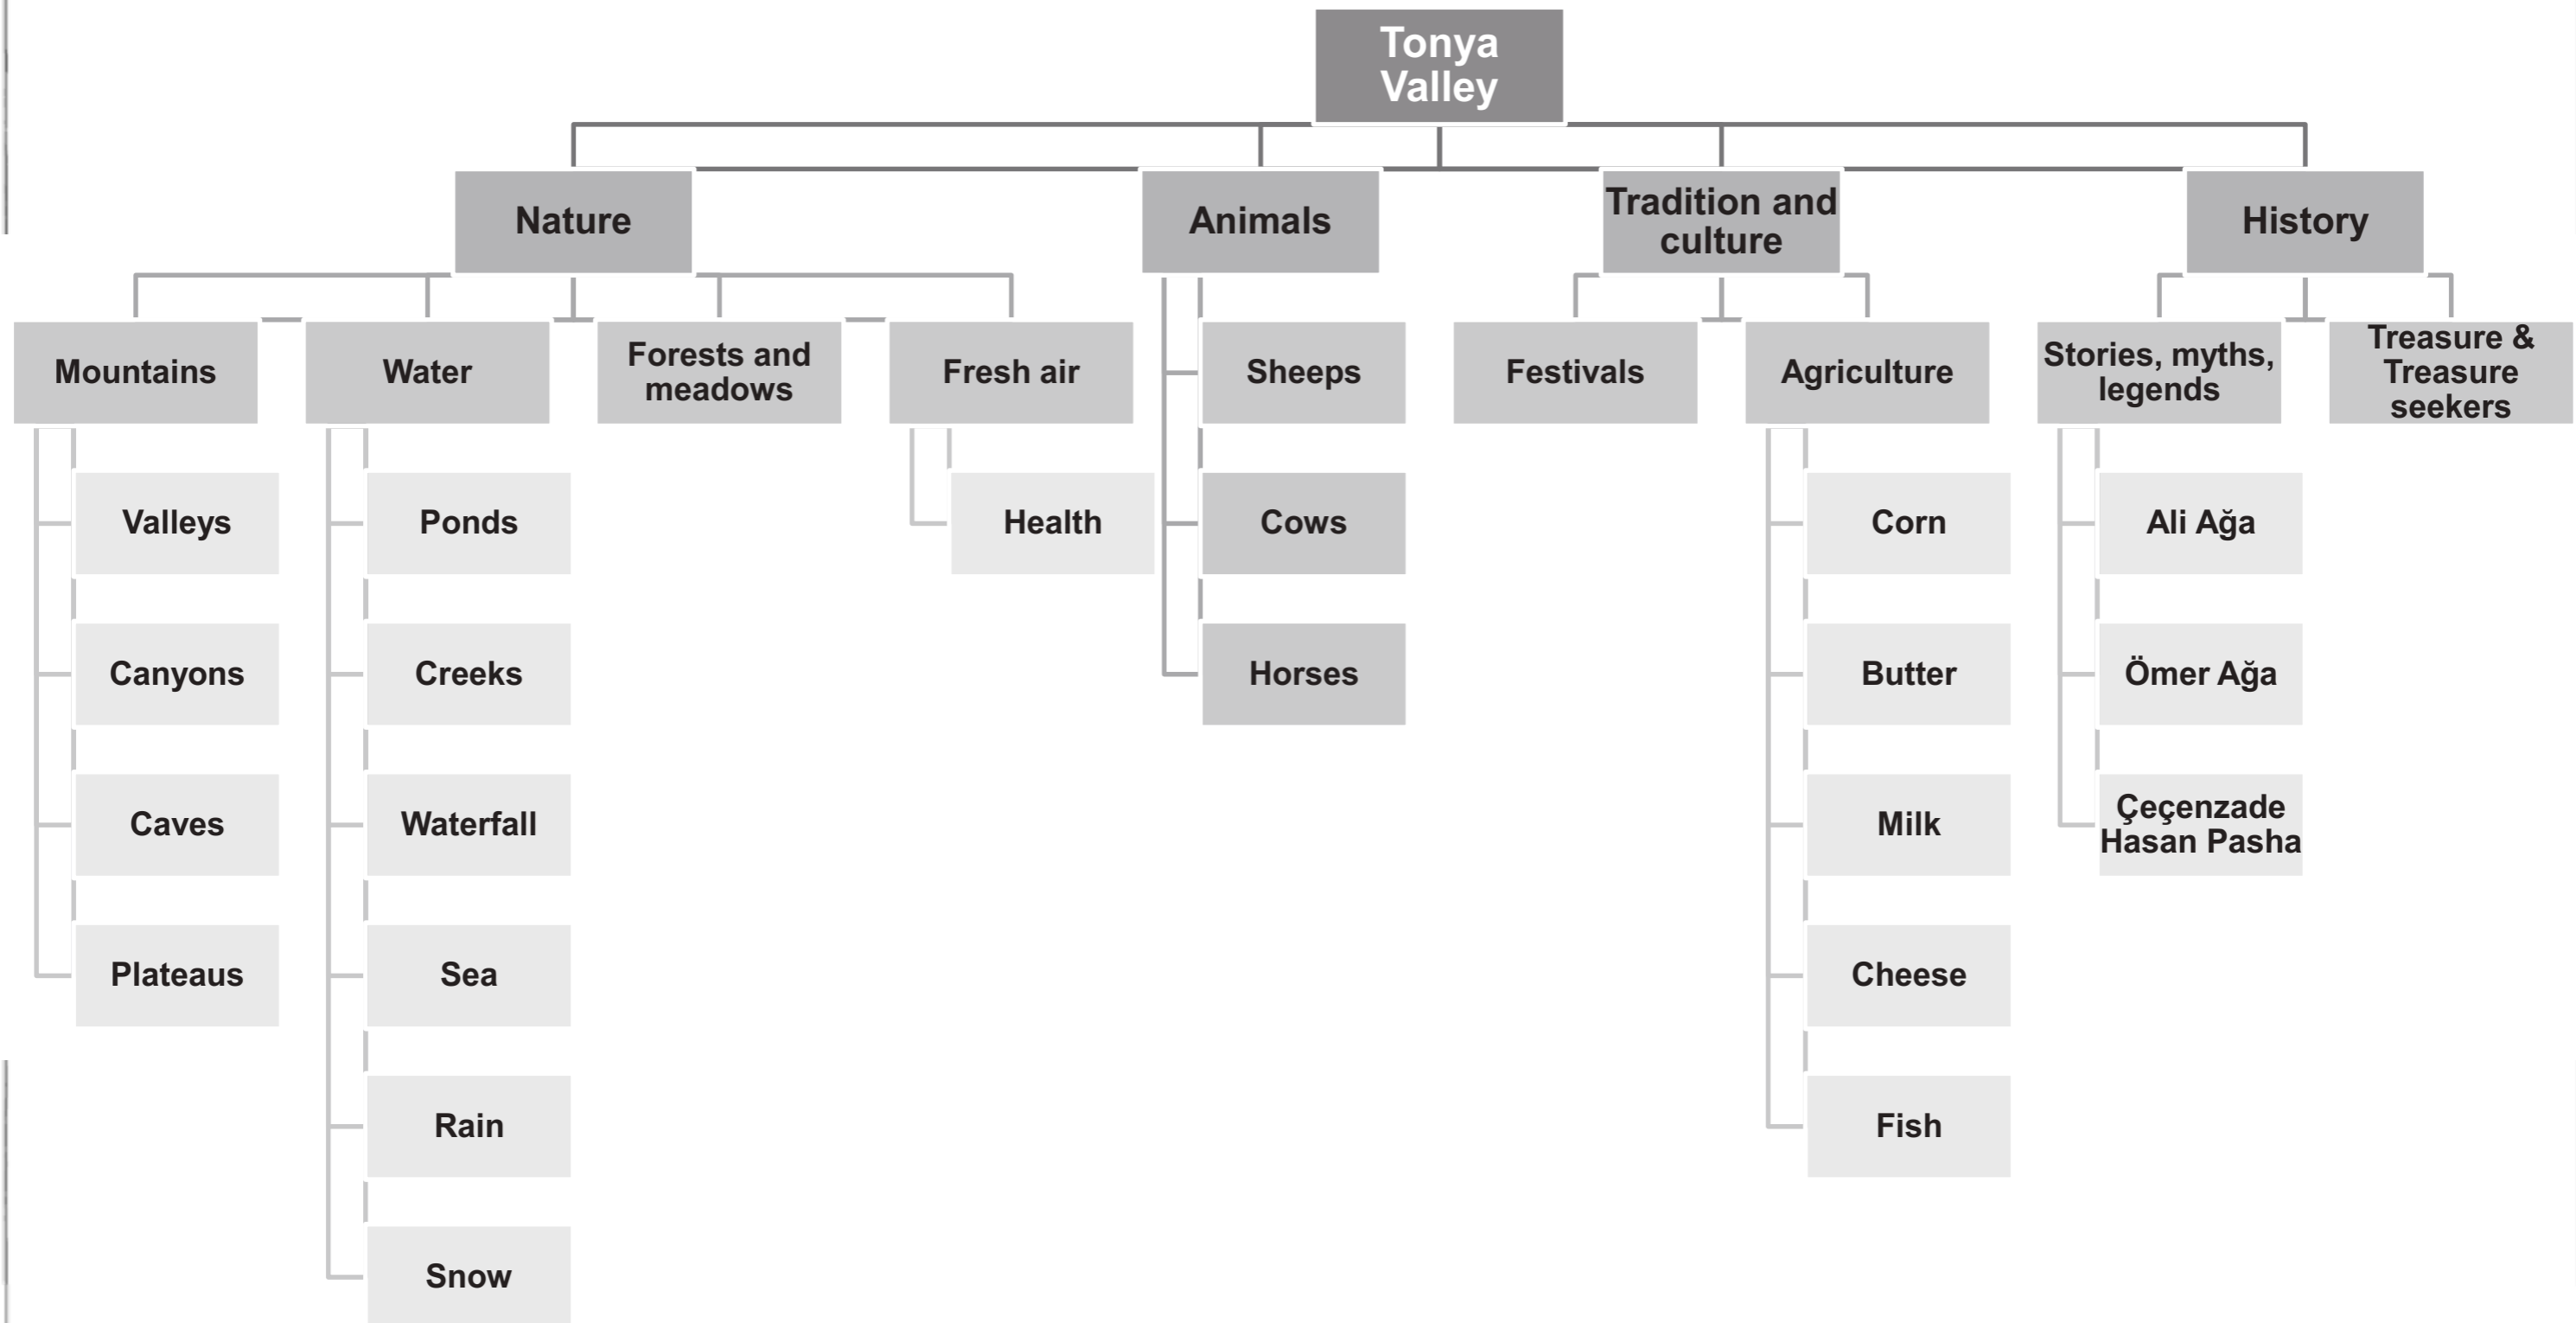

The focus of the development will be on summer, but there also must be an offer for the other seasons

Tonya Valley needs a marketable Highlight

There must be a total brand for Tonya Valley created under which all offers related to the POI will fit

Topics and Features (USP-Finding)

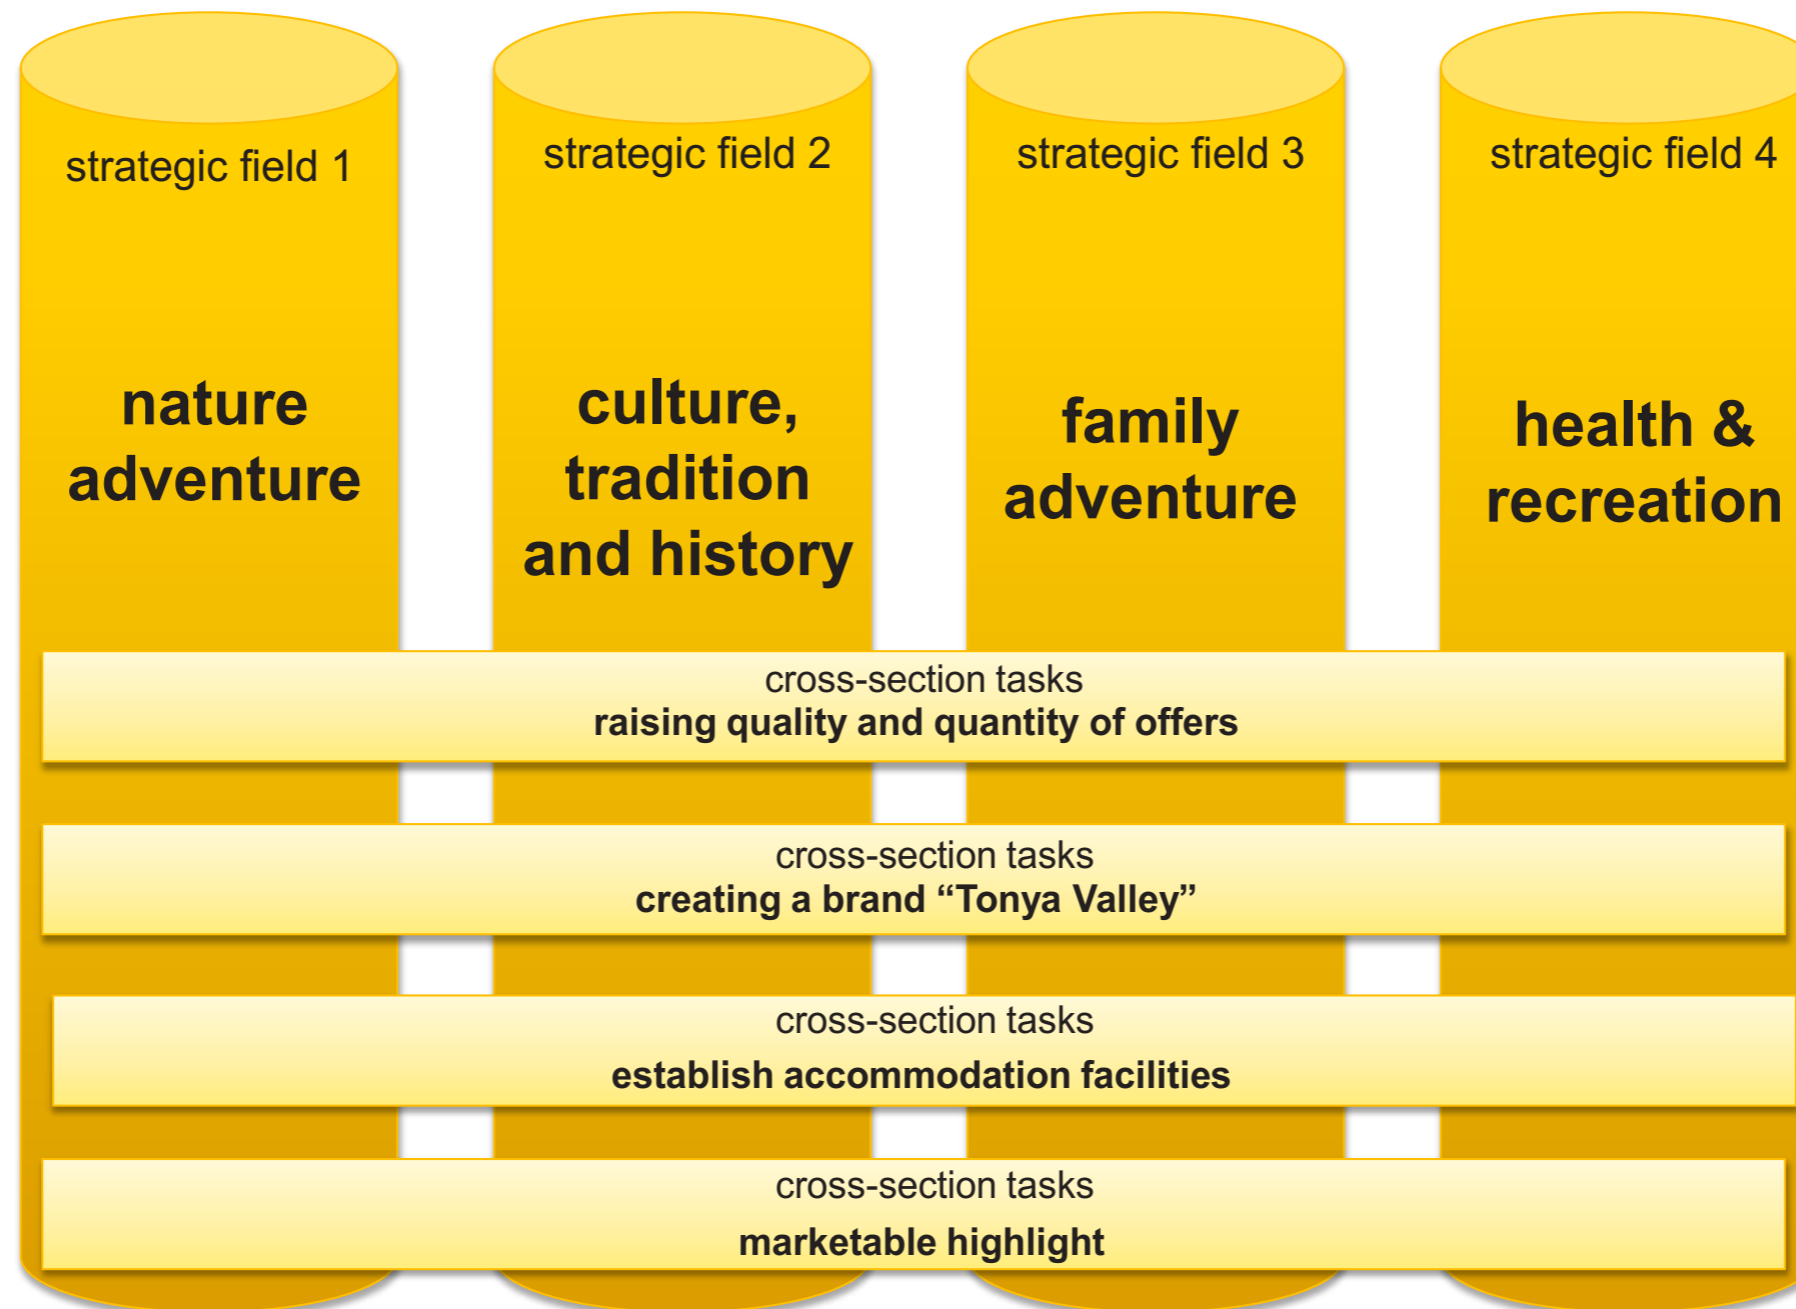

Unique Selling Proposition (USP)

Profiling of Tonya Valley

Main Topics and Strategic Focus

Touristic Target Groups

Category	Definition
Age	3-99 Years (widest possible coverage)
Sex	Independent
Grouping	Families with kids, couples without kids, groups of friends
Origin	Turkey, Arabic countries, visitors spending their holiday in Trabzon
Duration of stay	Visitors for one day and several days
Preferential offering	Adventure, enjoyment of nature, rest and relaxation, health, sport, tradition and culture
Financial added value	High to low
Season	Focusing on summer, basically all year
